

Appendix H: Country Addendums

PHILIPPINES

Accepted Fuel Types: Biomass Combustion - Agricultural Products(BAP)
Biomass Combustion - Agricultural Waste(BAW)
Biomass Combustion - Animal Waste(BCA)
Biomass Combustion - Liquid Biofuels(BML)
Biomass – Animal Waste - Swine Waste, Solid or Gas(BA1)
Biomass – Animal Waste - Poultry Waste, Solid or Gas(BA2)
Biomass Combustion - Wood Products(BWP)
Biomass Combustion - Wood Waste(BWW)
Biogas - Wastewater Methane (BGW)
Geothermal (GE1)
Solar Photovoltaics(SO1)
Solar Serving On-Site Load(SOL)
Wind(WND)

Requirements: Generating Unit must be interconnected to the National Grid Corporation of the Philippines (NGCP).

Aggregated Assets and Customer-Sited Distributed Generation are permitted.

Generating Unit must have Revenue-Quality Meters as mandated by applicable law and regulation.

No sale, transfer or other use of TIGRs requiring registration under The Securities Regulation Code or any accompanying regulations

No TIGRs will be issued for net metering (the Renewable Energy Act of 2008 provides that all RECs are for the account of the utility that is providing the net meter)

Generating Unit cannot be registered with the Renewable Energy Registry mandated by the Renewable Energy Act of 2008
