

Appendix H: Country Addendums

MALAYSIA

Accepted Fuel Types: Geothermal (GE1)
Solar (SOL)
Wind (WND)

Requirements: Generating Unit must be interconnected to the grid, able to add generation to the grid or, if generator has onsite load, able to receive energy from the grid.

Generation unit must have come online in the last 15 years, or be repowered, in order to be registered to issue TIGRs.

Generating Unit must have Revenue-Quality Meters, ANSI-C12 or other equivalent standard such as IEC Standards.

Activities regulated by the local Securities Regulatory Commission are not permitted.

If Malaysia adopts Renewable Portfolio Standard compliance in the future, TIGRs will not be issued in respect of energy that is used for such compliance.

TIGRs must be fully aggregated resources with all carbon benefit included, owned, and not sold separately or registered in another attribute tracking system including but not limited to the UNFCC's CDM registry.
